

# COLLEGE VISIT SEASON IS HERE!

You know what that means.

Lots of travel.

All-day campus tours.

So. Many. Hoodies.

And hopefully, the discovery of a place to call home for the next four years (or more, depending on your program).

That's what these visits are about, after all. Finding the place you belong.

We hope you find it at IC.

HERE'S WHY WE THINK YOU SHOULD MAKE THE TRIP.

## FEEL THAT FEELING

It sounds strange until you experience it for yourself: you go to a college campus, walk around, talk to people, and it just feels...right. **It fits.**

For a lot of people, that happens at IC. For some, it happens somewhere else, and that's cool, too. Be your most awesome self, find your place, find your people.

## CHECK OUT THE VIEW

Sure, Ithaca's a little hilly.

But when you see this view, you'll know all that angled walking is totally worth it. Not only will your legs have near superhuman strength by your second semester, but you'll also get to see a view every day that makes every cell in your brain refreshed, inspired, and ready to learn.\*

\*statement not verified by a brain scientist

## TAKE IN THE ART

See our galleries and performance spaces, stay for a show, maybe stumble upon one of our roving campus troubadours.

You can find out what this thing is.

Or make a wish on a turtle.

## SEE SOMETHING GORGES

Maybe you've seen "Ithaca Is Gorges" on a T-shirt or bumper sticker. The famous phrase was created by one of our own IC professors and has been used to describe the awe-inspiring, no-filter-needed beauty of our town for decades.

Visit and you'll see why.

100+ PROGRAMS  
11:1 STUDENT-FACULTY RATIO  
AVERAGE CLASS SIZE: 17

## LEARN WHAT YOU CAN LEARN

That's pretty important.

There's nothing worse than falling in love with a college only to find out it doesn't have the major or program you want.

Luckily, we've got over 100 interesting ways to choose from, and lots of helpful people to guide you.

Come talk to our admission counselors, faculty, and students about the possibilities.

### LEARNING AT IC

IC is all about learning for the real world, with all its unpredictability, new technology, and need for different kinds of knowledge. Learning at IC, you'll have immediate access to all kinds of information, equipment, and technology in classes, labs, internships, and fieldwork. Then, you'll learn how it can all work together—sometimes in ways nobody's thought of before.

### PROFESSORS WHO SEE THE FUTURE

No ESP here, just the expertise to think several leaps ahead. The best thing about professors who are active in their fields is that they know what's coming. Your courses won't be based on lessons that will soon be outdated—IC professors will help you prepare for the challenges yet to come. And with small class sizes, they'll be focused on you.

### EXPLO (IF YOU DON'T KNOW)

[ithaca.edu/exploratory](http://ithaca.edu/exploratory)

Hopefully you aren't freaking out if you don't know what you want to study. It's totally normal. But going to college "undecided" can feel a little...wobbly. That's why IC has the Exploratory Program, so you can try out a bunch of different programs and discover what really makes sense for you (and still graduate on time). The best part? You'll have your very own explo advisor to guide you along the way and help you make the best decisions.
